CONTENTS

NUMBER 1–2

F. M. Kuni, A. P. Grinin and Y. S. Djikaev	1	Kinetics of two-component condensation under dynamic regime with "synchronous" attainment of the metastability maximum
J. C. Barrett and N. A. Webb	31	A comparison of some approximate methods for solving the aerosol general dynamic equation
N. Kourti and A. Schatz	41	Solution of the general dynamic equation (GDE) for multicomponent aerosols
Harry M. ten Brink	57	Reactive uptake of HNO_3 and H_2SO_4 in sea-salt (NaCl) particles
R. Vehring	65	Linear Raman spectroscopy on aqueous aerosols: influence of nonlinear effects on detection limits
T. K. Lesniewski and W. Koch	81	Production of rounded Ti- and Al-hydroxide particles in a turbulent jet by coagulation-controlled growth followed by rapid coalescence
Chang-Gull Song and Jungho Hwang	99	Particle deposition on a rotating disk in application to vapor axial deposition (VAD) process
Marcos M. Alvarez, Igor Vezmar and Robert L. Whetten	115	On-line sampling and intact mass analysis of nanometer-size aerosols via time-of-flight high-mass spectrometry
Sergey Biryukov	129	An experimental study of the dry deposition mechanism for airborne dust
Pushkar Tandon and Michael A. Adewumi	141	Particle deposition from turbulent flow in a pipe
G. Buzorius, Ü. Rannik, J. M. Mäkelä, T. Vesala and M. Kulmala	157	Vertical aerosol particle fluxes measured by eddy covariance technique using condensational particle counter
P. Ebert, M. Kibler, A. Mainka, B. Tenberken, K. Baechmann, G. Frank and J. Tschiersch	173	A field study of particle scavenging by raindrops of different sizes using monodisperse trace aerosol
Ming Ouyang and R. Sarangapani	197	Particles do not increase vapor deposition in human airways

Adel H. Hashish, John S. Fleming, Joy Conway, Peter Halson, Elizabeth Moore, Trevor J. Williams, Adrian G. Bailey, Michael Nassim and Stephen T. Holgate — 205 Lung deposition of particles by airway generation in healthy subjects: three-dimensional radionuclide imaging and numerical model prediction

B.-A. Zucker and W. Müller — 217 Concentrations of airborne endotoxin in cow and calf stables

Technical note

J. Stier and G. Quinten — 223 Simple refractive index correction for the optical particle counter PCS 2000 by Palas

News Items

227 Abstracts of the 11th Annual Conference of the Aerosol Society

239 Abstracts of the 1996 International Conference on Aerosol Science and Technology

257 Corrigendum

NUMBER 3

S. Jain and T. T. Kodas — 259 Asymptotic widths of size distributions resulting from collisional growth assuming log-normally distributed fractal aggregates

M. Alonso, T. Hashimoto, Y. Kousaka, M. Higuchi and T. Nomura — 263 Transient bipolar charging of a coagulating nanometer aerosol

S. Che, O. Sakurai, K. Shinozaki and N. Mizutani — 271 Particle structure control through intraparticle reactions by spray pyrolysis

I. Fängmark and J. C. Carpin — 279 Stability of urease during aerosolizaiton: the effect of operating conditions

H. Fissan, A. Pöcher, S. Neumann, D. Boulaud and M. Pourprix — 289 Analytical and empirical transfer functions of a simplified spectromètre de mobilité electrique circulaire (SMEC) for nano particles

C. Lu and H. Huang — 295 A sectional model to predict performance of a plate-wire electrostatic precipitator for collecting polydisperse particles

S. Haber and A. Tsuda — 309 The effect of flow generated by a rhythmically expanding pulmonary acinus on aerosol dynamics

G. Ziskind, M. Fichman and C. Gutfinger — 323 Effects of shear on particle motion near a surface—application to resuspension

W. C. Keene, R. Sander, A. A. P. Pszenny, R. Vogt, P. J. Crutzen and J. N. Galloway — 339 Aerosol pH in the marine boundary layer: a review and model evaluation

M. Del Guasta, M. Morandi, L. Stefanutti, S. Balestri, E. Kyro, M. Rummukainen, R. Kivi, V. Rizi, B. Stein, C. Wedekind, B. Mielke, R. Matthey, V. Mitev and M. Douard — 357 LIDAR observation of spherical particles in a $-65°$ cold cirrus observed above Sodankyla (Finland) during S.E.S.A.M.E.

P. G. Dougle, J. Pepijn Veefkind and H. M. ten Brink — 375 Crystallisation of mixtures of ammonium nitrate, ammonium sulfate and soot

I Report on 3rd Meeting of the European Aerosol Assembly Working Group on Nanoparticles in Aerosols

III Announcements

NUMBER 4

COMBUSTION AEROSOLS

E. I. Kauppinen — 387 Preface

H. Burtscher, S. Künzel and C. Hüglin — 389 Characterization of particles in combustion engine exhaust

A. D'Alessio, A. D'Anna, G. Gambi and P. Minutolo — 397 The spectroscopic characterisation of UV absorbing nanoparticles in fuel rich soot forming flames

G. Skillas, S. Künzel, H. Burtscher, U. Baltensperger and K. Siegmann — 411 High fractal-like dimension of diesel soot agglomerates

K. A. Christensen, M. Stenholm and H. Livbjerg — 421 The formation of submicron aerosol particles, HCl and SO_2 in straw-fired boilers

T. Valmari, E. I. Kauppinen, J. Kurkela, J. K. Jokiniemi, G. Sfiris and H. Revitzer — 445 Fly ash formation and deposition during fluidized bed combustion of willow

J. Latva-Somppi, M. Moisio, E. I. Kauppinen, T. Valmari, P. Ahonen, U. Tapper and J. Keskinen — 461 Ash formation during fluidized-bed incineration of paper mill waste sludge

I Announcements

NUMBER 5–6

NANOMETER PARTICLES: A NEW FRONTIER FOR MULTIDISCIPLINARY RESEARCH

D. Y. H. Pui, Da-Ren Chen and J. R. Brock	vii	Editorial
O. Preining	481	The physical nature of very, very small particles and its impact on their behaviour
D.-R. Chen, D. Y. H. Pui, D. Hummes, H. Fissan, F. R. Quant and G. J. Sem	497	Design and evaluation of a nanometer aerosol differential mobility analyzer (Nano-DMA)
F. E. Kruis, H. Fissan and A. Peled	511	Synthesis of nanoparticles in the gas phase for electronic, optical and magnetic applications—a review
S. L. Kaufman	537	Analysis of biomolecules using electrospray and nonparticle methods: the gas-phase electrophoretic mobility molecular analyzer (GEMMA)
K. Donaldson, X. Y. Li and W. MacNee	553	Ultrafine (nanometre) particle mediated lung injury
A. Gomez, D. Bingham, L. de Juan and K. Tang	561	Production of protein nanoparticles by electrospray drying
D. B. Kittleson	575	Engines and nanoparticles: a review
L. de Juan and J. Fernández de la Mora	589	Sizing nanoparticles with a focusing impactor: effect of the collector size
R. J. Weber, M. R. Stolzenburg, S. N. Pandis and P. H. McMurry	601	Inversion of ultrafine condensation nucleus counter pulse height distributions to obtain nanoparticle ($\sim$3–10 nm) size distributions
L. de Juan and J. Fernández de la Mora	617	High resolution size-analysis of nanoparticles and ions: running a Vienna DMA of near optimal length at Reynolds numbers up to 5000
H. Cai, N. Chaudhary, J. Lee, M. F. Becker, J. R. Brock and J. W. Keto	627	Generation of metal nanoparticles by laser ablation of microspheres
J. A. Haber, N. V. Gunda and W. E. Buhro	637	Nanostructure by design: solution-phase-processing routes to nanocrystalline metals, ceramics, intermetallics, and composites
P. T. Spicer, C. Artelt, S. Sanders and S. E. Pratsinis	647	Flame synthesis of composite carbon black-fumed silica nanostructured particles

J. P. Borra, A. Goldman, M. Goldman and D. Boulaud — 661 Electrical discharge regimes and aerosol production in point-to-plane DC high pressure cold plasmas: aerosol production by electrical discharges

M. Sugasawa, N. Kikukawa, N. Ishikawa, N. Kayano and T. Kimura — 675 Synthesis of Y–Fe–O ultrafine particles using inductively coupled plasma

S. H. Ehrman, S. K. Friedlander and M. R. Zachariah — 687 Characteristics of SiO_2/TiO_2 nanocomposite particles formed in a premixed flat flame

N. P. Rao, N. Tymiak, J. Blum, A. Neuman, H. J. Lee, S. L. Girshick, P. H. McMurray and J. Heberlein — 707 Hypersonic plasma particle deposition of nanostructured silicon and silicon carbide

J. J. Helble — 721 Combustion aerosol synthesis of nanoscale ceramic powders

K. Deppert, M. H. Magnusson, L. Samuelson, J.-O. Malm, C. Svensson and J.-O. Bovin — 737 Size-selected nanocrystals of III–V semiconductor materials by the aerotaxy method

749 Reviews of national research programs in nanoparticle and nanotechnology research

I Future Meetings

NUMBER 7

R. McGraw, S. Nemesure and S. E. Schwartz — 761 Properties and evolution of aerosols with size distributions having identical moments

R. K. Newsom and C. W. Bruce — 773 Orientational properties of fibrous aerosols in atmospheric turbulence

Z. D. Ristovski, L. Morawska and N. D. Bofinger — 799 Investigation of a modified Sinclair–La Mer aerosol generator in the submicrometer range

R. Tsai, Y. P. Chang and T. Y. Lin — 811 Combined effects of thermophoresis and electrophoresis on particle deposition onto a wafer

Chung-te Lee and Wen-Chuan Hsu — 827 A novel method to measure aerosol water mass

Chuen Jinn Tsai, Hung Min Chein, Shu Ting Chang and Jong Yoh Kuo — 839 Performance evaluation of an API aerosizer™

O. Witschger, K. Willeke, S. A. Grinshpun, V. Aizenberg, J. Smith and P. A. Baron — 855 Simplified method for testing personal inhalable aerosol samplers

G. Ramachandran, A. Sreenath and J. H. Vincent — 875 Towards a new method for experimental determination of aerosol sampler aspiration efficiency in small wind tunnels

C. E. Kolb, D. R. Worsnop, J. T. Jayne and P. Davidovits — 893 Comment on mathematical models of the uptake of $ClONO_2$ and other gases by atmospheric aerosols

NUMBER 8

M. Wilck, K. Hämeri, F. Stratmann and M. Kulmala — 899 Determination of homogeneous nucleation rates from laminar flow diffusion chamber data

M. Lazaridis and D. Melas — 913 New sulfate particle formation during summer pollution episodes using a 3-D aerosol model

V.-M. Kerminen, K. Teinilä, R. Hillamo and T. Pakkanen — 929 Substitution of chloride in sea-salt particles by inorganic and organic anions

F. J. Romay, S. S. Takagaki, D. Y. H. Pui and B. Y. H. Liu — 943 Thermophoretic deposition of aerosol particles in turbulent pipe flow

P. Armand, D. Boulaud, M. Pourprix and J. Vendel — 961 Two-fluid modeling of aerosol transport in laminar and turbulent flows

M. Alonso, Y. Kousaka, T. Hashimoto and N. Hashimoto — 985 Simplified analysis of the effect of Brownian diffusion on the relationship between applied voltage and central mobility in the DMA

Wen-I. Li, M. Perzl, G. A. Ferron, R. Batycky, J. Heyder and D. A. Edwards — 995 The macrotransport properties of aerosol particles in the human oral-pharyngeal region

P. K. P. Burnell, A. Malton, K. Reavill and M. H. E. Ball — 1011 Design, validation and initial testing of the *Electronic Lung*™ device

Technical Note

K. Takeuchi, Y. Kuga, S. Satooka and K. Okuyama — 1027 Growth of UF_5 nanoparticles formed by laser photolysis in a supersonic nozzle reactor

NUMBER 9

K. E. J. Lehtinen, M. Kulmala, T. Vesala and J. K. Jokiniemi — 1035 Analytical methods to calculate condensation rates of a multicomponent droplet

R. Vehring, C. L. Aardahl, G. Schweiger and E. J. Davis — 1045 The characterization of fine particles originating from an uncharged aerosol: size dependence and detection limits for Raman analysis

G. Göbel, T. Wriedt and K. Bauckhage — 1063 Micron and sub-micron aerosol sizing with a standard phase-doppler anemometer

B. Sachweh, H. Umhauer, F. Ebert, H. Büttner and R. Friehmelt — 1075 *In situ* optical particle counter with improved coincidence error correction for number concentrations up to 10^7 particles cm^{-3}

A. S. Hassan, A. El-Hussein and A. A. Ahmed — 1087 Effect of Peclet number on transmission of free and attached radon daughters through a circular tube with concurrent formation and attachment

G. Ahmadi and Q. Chen — 1097 Dispersion and deposition of particles in a turbulent pipe flow with sudden expansion

I. G. Loscertales — 1117 Drift differential mobility analyzer

M. Ram and S. A. Cain — 1141 A new practical formula for calculating free-stream aerosol particle properties in airborne sampling applications

S. A. Cain and M. Ram — 1145 Numerical simulation studies of the turbulent airflow through a shrouded airborne aerosol sampling probe and estimation of the minimum sampler transmission efficiency

S. A. Cain, M. Ram and S. Woodward — 1157 Qualitative and quantitative wind tunnel measurements of the airflow through a shrouded airborne aerosol sampling probe

NUMBER 10

REMOTE SENSING OF AEROSOLS

E. Mészáros, A. Molnár and J. Ogren — 1171 Scattering and absorption coefficients vs chemical composition of fine atmospheric aerosol particles under regional conditions in Hungary

V. V. Zuev, V. D. Burlakov and A. V. El'nikov — 1179 Ten years (1986–1995) of lidar observations of temporal and vertical structure of stratospheric aerosols over Siberia

I. Mateshvili, G. Mateshvili and N. Mateshvili — 1189 Measurement of the vertical aerosol distribution in the middle atmosphere by the twilight sounding method

C. S. Oliveros, F. J. O. Reyes and L. Alados-Arboledas — 1199 Determination of aerosol optical thickness from measurements of spectral sky radiance

F. Esposito, C. Serio, G. Pavese, G. Auriemma and C. Satriano — 1213 Measurements of nighttime atmospheric optical depth preliminary data from a mountain site in southern Italy

F. Esposito, G. Pavese, M. Santoro, C. Serio and V. Cuomo — 1219 — Ozone correction to the aerosol optical depth in the Chappuis band

M. F. Carfora, F. Esposito and C. Serio — 1225 — Numerical methods for retrieving aerosol size distributions from optical measurements of solar radiation

J. P. Veefkind and G. de Leeuw — 1237 — A new algorithm to determine the spectral aerosol optical depth from satellite radiometer measurements

SUPPLEMENT 1

ABSTRACTS OF THE 5TH INTERNATIONAL AEROSOL CONFERENCE 1998

Part 1

Page number

Session 1A: Atmospheric Hygroscopic Properties

JUN XU, D. IMRE, R. MCGRAW: Properties of ammoniated sulfate aerosols at low temperatures: why are the models so far off? S1

M. KRÄMER: Alteration of atmospheric particle solubility by cloud processing S3

A. VIRKKULA, R. VAN DINGENEN, F. RAES, J. HJORTH, N. JENSEN, L. RUPPERT, M. SPITTLER, P. NEEB, R. WINTERHALTER, K. WIRTZ: Hygroscopic properties of the oxidation products of monoterpenes when condensing on ammonium sulfate aerosols S5

M. VAKEVÄ, K. HÄMERI, J.M. MÄKELÄ: Hygroscopic properties of ultrafine aerosol particles measured at three sites in Finland S7

E. SWIETLICKI, J. ZHOU, O.H. BERG, E.D. NILSSON, P.P. AALTO, C. LECK: Hygroscopic behaviour of aerosol particles in the arctic marine boundary layer – relation to air mass history and mixing S9

Session 1B: Instrumentation I

P.A. BARON, P. GAO, G.J. DEYE, A.C. MAYNARD: Performance of a fiber length classifier S11

Z. ULANOWSKI, P.H. KAYE, E. HIRST: Respirable asbestos detection using light scattering and magnetic alignment S13

W. HOLLÄNDER, H. LÖDDING, W. DUNKHORST: A flexible impactor optimized for field use S15

H. BARTHEL, B. SACHWEH, F. EBERT: Experimental results in characterization using the fiber aerosol analyzer (FAA) S17

K. EHARA, S. SHIN: Measurement of density distribution of aerosol particles by successive classification of particles according to their mass and diameter S19

Session 1C: Atmospheric Chemical Properties I

S.C. PRYOR, R.J. BARTHELMIE, L.L.S GEERNAERT, T. ELLERMANN, K.D. PERRY: Aerosols in the Western Baltic: Results from ASEPS '97 S21

H. CACHIER, S. RUELLAN, C. LIOUSSE: Biomass burning aerosols in tropical Africa S23

K. ELEFTHERIADIS, MENG-CHEN CHUNG, I. COLBECK: Atmospheric aerosol formation over Athens S25

HONG ZHUANG, CHAK KEUNG CHAN: An investigation of sulfate, nitrate size distribution and chloride depletion of coastal aerosols S27

Session 1D: Materials I: Nanoparticles

HEE DONG JANG, S.K. FRIEDLANDER: Restructuring of chain aggregates of titania nanoparticles in the gas phase S29

S.H. EHRMAN: Effect of internal pressure on nanoparticle coalescence S31

M.R. ZACHARIAH, M.J. CARRIER: Atomistic simulation of sintering rates: comparison with phenomenological models S33

S.K. FRIEDLANDER, M. ULLMANN, HEE DONG JANG, K.H. RYU: Elastic properties and morphology of titania nanoparticle chain aggregates S35

P.P. AHONEN, E.I. KAUPPINEN, J.L. DESCHANVRES, J.C. JOUBERT, G. VAN TENDELOO: Aerosol decomposition synthesis of nanocrystalline titania powder from alkoxide precursor S37

Session 1E: Nucleation

A.A. LUSHNIKOV, M. KULMALA: Nucleation burst in coagulating aerosol S39

I.J. FORD, H. ARSTILA: Critical clusters and droplet nucleation rates using Monte Carlo simulation and the second nucleation theorem S41

R.B. MCCLURG: Effect of magic numbered clusters on the rate of homogeneous nucleation S43

Y. OKADA, K. ASHIMINE, K. TAKEUCHI: Measurement of onset of clustering in steady supersonic laval nozzle flow by FT-IR spectroscopy S45

J.C. BARRETT: Equilibrium populations stable dimers and consistency in nucleation theory S47

Session 2A: Aerosol–Cloud interactions

S.R. OSBORNE, D.W. JOHNSON: The processing of aerosol by low-level clouds S49

M.H. SMITH, C.D. O'DOWD, J.A. LOWE, A. JONES: Role of sea salt aerosol in the indirect radiative forcing of climate S51

A. SCHWARZENBÖCK, J. HEINTZENBERG, S. MERTES, A. WIEDENSOHER: Correlations of the partitioning fraction of aerosols in clouds S53

C. ERLICK, L.M. RUSSELL, V. RAMASWAMY: A microphysics-based investigation of aerosol–cloud interactions and their radiative effects S55

Session 2B: Instrumentation II: Analysis

R.G. PINNICK, S.C. HILL, S. NILES, N.F. FELL, JR., G. VIDEEN, S. HOLLER, F. FELL, R.K. CHANG: Fluorescence spectrum analyzer for rapid measurement of single micrometer-sized biological aerosols S57

D. BAUMGARDNER: The OPC as a single particle nephelometer S59

C.-J. TSAI, W.-S. YANG, H.-M. CHEIN: Theoretical study of the counting efficiency of an API aerosizer™ S61

H. TAMMET: Optimal length of the plain loscertales mobility analyzer S63

R. MAVLIEV, HWA-CHI WANG: On the particle growth in a turbulent mixing CNC S65

Session 2C: Atmospheric Chemical Properties II

I. SALMA, W. MAENHAUT, J. BOBVOS, É. ZEMPLÉN-PAPP: Multi-elemental composition and sources of size-fractionated aerosols in Budapest S67

C. PAPASTEFANOY, A. IOANNIDOU: Activity size distribution of radioactive aerosols in the atmosphere S69

M.C. FACCHINI, S. FUZZI, S. ZAPPOLI, A. ANDRACCHIO, A. GELENCSÉR, G. KISS, Z. KRIVÁCSY, E. MÉSZÁROS, H.-C. HANSSON, T. ALSBERG, Y. ZEBÜHR: Partitioning of the organic aerosol component between for droplets and interstitial air S71

L.C. MARR, A.H. MIGUEL, T.W. KIRSCHSTETTER, R.A. HARLEY, S.V. HERING, S.K. HAMMOND: Real-world emissions of PAH in the exhaust of California reformulated gasoline- and heavy duty diesel-fueled vehicles S73

Session 2D: Materials II: Production and Analysis

B.W. LEE, K.S. PARK, M. CHOI: An analysis of multicomponent aerosol dynamics for the modified chemical vapor deposition process S75

J. BLUM, A. NEUMAN, N. TYMIAK, N.P. RAO, S.L. GIRSHICK, J.V.R. HEBERLEIN, W. GERBERICH, P.H. MCMURRY: Experimental study of nanostructured silicon carbide film formation by hypersonic plasma particle deposition S77

M.T. SWIHART, S. NIJHAWAN, M.R. MAHAJAN, S.-M. SUH, S.L. GIRSGIC: Modeling the nucleation kinetics and aerosol dynamics of particle formation during CVD of silicon from silane S79

S. NIJHAWAN, N.P. RAO, P.H. MCMURRY, S.A. CAMPBELL, J.E. BROCKMANN: Application of particle beam mass spectrometery to aerosol formation and transport in silane LPCVD S81

Session 2E: Nucleation and Growth in Flows

T.J. BALDWIN, J.C. BARRETT: Maximum saturations and nucleation in laminar tube flow S83

D. BROWN, J. PYYKÖNEN, J. JOKINIEMI: Comparison of lognormal moment and sectional representations of aerosol dynamics processes S85

M. WILCK, F. STRATMANN, L.A. LARSEN, R. VAN DINGENEN, F. RAES: Modelling of sulfuric acid and ammonium sulfate aerosol formation in the AERREA2 reactor S87

V.B. MIKHEEV, V.V. PERVUKHIN, N.S. LAULAINEN: Nucleation studies using a laminar flow tube reactor and a mass-spectrometer with atmospheric pressure ionization S89

F.E. LARRODE, C. HOUSIADAS, Y. DROSSINOS: Supersaturation ratio for a combined Graetz problem S91

Session 3A: Atmospheric Number, Size and Mass I

D.R. JENSEN, C.H. WASH, M.S. JORDAN: Air mass parameterization and coastal aerosol modeling S93

D. MARK, J. YIN, R.H. HARRISON, J. BOOKER, S. MOORCROFT: Measurements of PM10, PM2.5 particles at four outdoor sites in the UK S95

K.P. KOUTSENOGII, P.K. KOUTSENOGII: Project ≪ Siberian Aerosols ≫ S97

M.D. KEYWOOD, G.P. AYERS, J.L. GRAS, D. COHEN: The use of a micro-orifice uniform deposit impactor (moudi) to investigate relationships between PM10, PM2.5, PM1 and ultrafine particles in urban Australia S99

E.M. VAN PUTTEN, H.J.Th. BLOEMEN, A. VAN DER MEULEN: Results of a one-year long survey of PM2.5 measurements in the Netherlands S101

Session 3B: Instrumentation III: Analysis

W.D. DICK, P.J. ZIEMANN, P.H. MCMURRY: Shape and refractive index of submicron atmospheric aerosols from multiangle light scattering measurements S103

D.J. RADER, J.E. BROCKMANN, T.W. GRASSER, J.N. CASTANEDA: Annular-beam laser for in situ particle sizing/velocimetry S105

E.J. NIJMAN, A.W. WILLEMSE, K.B. GEERSE, J.C.M. MARIJNISSEN, B. SCARLETT: Photon correlation spectroscopy for analysis of particle size and concentration of low concentration aerosols S107

R.E. NEUHAUSER, U. PANNE, R. NIESSNER: Laser-induced plasma spectroscopy (LIPS): A versatile tool for monitoring heavy metals in aerosol streams S109

J.T. JAYNE, D.R. WORSNOP, C.E. KOLB, D. LEARD, P. DAVIDOVITS, X. ZHANG, K.A. SMITH: Aerosol mass spectrometer for size and composition analysis of submicron particles S111

Session 3C: Atmospheric Chemical Properties III

L. HUSAIN, V.A. DUTKIEWICZ: Determination of a quantitative relationship between regional SO_2 emissions and downwind atmospheric sulfur burden S113

V. WONGPHATARAKUL, S.K. FRIEDLANDER, J.P. PINTO: A comparative study of $PM_{2.5}$ ambient aerosol chemical databases S115

R. STRADER, C. DAVIDSON, V. ETYEMEZIAN, S. FINGER, S. JANHÄLL, P. MOLNAR, K. MOLOI, M. ÖBLAD, M. STRIEGEL: Vertical gradients of airborne concentration and deposition of pollutants on buildings S117

CH. HUEGLIN, R. GEHRIG, CH. MOOR, U. BALTENSPERGER, CH. MONN: Characterization of PM_{10} and $PM_{2.5}$ in Switzerland S119

M.E. SCHLESINGER, N.G. ANDRONOVA, A. GHANEM, S. MALYSHEV, E. ROZANOV, W. WANG, F. YANG: Geographical scenarios of greenhouse-gas and anthropogenic-sulfate-aerosol induced climate changes S121

Session 3D: Materials III: Production and Analysis

B. SCHLEICHER, U. TAPPER, E.I. KAUPPINEN, M. MARTIN, L. ROSCHIER, M. PAALANEN, W. WERNSDORFER, A. BENOIT: Magnetization reversal measurements of individual magnetic nanoparticles produced by an aerosol route S123

F. Otten, K. Elihn, F.E. Kruis, M. Boman, J.-O. Carlsson, H. Fissan: Generation of monodisperse iron-containing nanoparticles by laser-assisted precipitation from ferrocene and mobility fractionation S125

M. Fierz, K. Siegmann, M. Aeschlimann: Electronic relaxation time in metallic nanoparticles S127

Guixiang Yang, Zhongming Wang, P. Biswas, W. Bresser, P. Boolchand: Processing titania based materials in flame reactors: From dopants to nano-composites S129

M. Lohmann, A, Schmidt-Ott: Experimental determination of spatial particle size distribution in liquid metal electrospray clouds S131

Session 3E: Heterogeneous and Ion Induced Nucleation

S. Haep, M. Luckas, K.-G. Schmidt: Binary heterogeneous nucleation in gas cleaning absorption process: estimating the critical saturation rate of H_2O-vapor and acid concentration inside the formed aerosol in a H_2O/HCl-acid system S133

D. Filipovicova, R. Ortner, G.P. Reischl, P.E. Wagner: Heterogeneous nucleation by ultrafine monodispersed Ag- and NaCl-particles in supersaturated n-propanol – water vapor mixtures S135

B. Gorbunov, R. Hamilton: Heterogeneous nucleation on aerosol particles S137

K. Hara, S. Nakae, K. Miura: Properties of ion-induced nucleation obtained from mobility measurements S139

T. Seto, K. Okuyama: Size and sign effects on the ion induced nucleation S141

Special Session: International Harmonization of Particulate Matter Indicators

J.R. Brook, T.F. Dann, A. Wiebe, S.M. Li, S. Sharma, Z. Nejedly, J. Chow, Y.Z. Tang: Intercomparison of sampling and analysis techniques for $PM_{2.5}$ monitoring S145

T.A.J. Kuhlbusch, A.C. John, H. Fissan: Differences of PM_x indicators determined by manual and automated devices S147

T. Yli-Tuomi, T. Raunemaa: Comparison of PM measurement devices used in Finland S149

A. Khlystov, P. Dougle, R. Otjes, P. Jongejan, A. Wayers-Jipelaan, H.M. Ten Brink: Comparison of four techniques for measurements of aerosol ammonium nitrate content S151

D.J. Eatough, F. Obeidi, Y. Pang: Semivolatile species in $PM_{2.5}$: A recommended indicator for $PM_{2.5}$ research or exposure monitoring S153

K.A. Prather, C. Noble, D. Liu, E. Gard: A new tool for characterizing the composition of aerosol particles as a function of size S155

D. Mark: The measurement of ambient airborne particles in the United Kingdom: historical review, current practice, and future directions S157

T.F. Dann, J.R. Brook: The Canadian fine particles program: Rationale and results S159

H.J.Th. Bloemen, E.M. van Putten, A. van der Meulen: Monitoring particulate matter in the Dutch national air quality monitoring network S161

A. van der Meulen: Monitoring airborne particle: PM_{10}, $PM_{2.5}$? S163

U. Baltensperger, L. Jalkanen: Aerosol studies in the WMO's global atmosphere watch programme S165

L. Morawska, D. Schwela: Airborne particles and health implications directions: Directions for the future S167

Poster Session 1

Atmospheric Aerosols: Physical Properties I

Xiao Y. Zhang, R. Arimoto, Z.S. An: Asian dust linked to global change S169

A. Micallef, J.J. Colls: The origins of PM_{10} particulate matter in the United Kingdom urban atmosphere: The role of sulphage aerosol S171

G.M. Afeti, F.J. Resch, A.K. Sunnu: Size and number distributions of the Harmattan dust aerosol in central Ghana S173

C. Sprengard-Eichel, M. Krämer, L. Schütz: Soluble and insoluble fractions of urban, continental and marine aerosol S175

Y.N. Samsonov, V.I. Makarov, K.P. Koutsenogii, V.F. Raputa: Wind drifts of pesticide aerosols after various methods of pesticide application S177

R.J. Weber, P.H. McMurry, F.L. Eisele, L. Mauldin, D. Tanner: Rapid growth of freshly formed nanoparticles in the remote troposphere S179

F.P. Neele, G. de Leeuw, M. Jansen, M. Stive, M.H. Smith: Aerosol production in the surf zone S181

C.D. O'Dowd, M.K. Hill, M.H. Smith: New particle formation: nucleation rates & spatial scales in the coastal environment S183

J. Piazzola, A.M.J. van Eijk, G. De Leeuw, M. Moerman: Marine aerosol concentrations at different locations of the northern hemisphere S185

Session 4D: Materials IV: Aerosol Synthesis

S. TSANTILIS, S.E. PRATSINIS, V. HAAS: Simulation of synthesis of palladium nanoparticles in an aerosol flow condenser S525

J. JOUTSENSAARI, E.I. KAUPPINEN, D. BERNAERTS, B. PAUWELS, S. AMELINCKX, G. VAN TENDELOO: Crystallite growth during aerosol synthesis of nanostructured fullerene particles S527

R.P. CAMATA, M. HIRASAWA, K. OKUYAMA, K. TAKEUCHI: Low pressure DMA studies of laser ablation aerosols S529

K. DEPPERT, T. KRINKE, M.H. MAGNUSSON, J.-O. MALM, L. SAMUELSON: Ultrafine gold particles by the evaporation/condensation method: fabrication and sintering S531

H. KLEINWECHTER, A. SCHMIDT-OTT, TH. BAUM, S. KIRSCH, B. RELLINGHAUS, P. ROTH, E. WASSERMANN: Diamond formation by CO_2-laser irradiation of graphitic particles S533

Session 4E: Clusters and Thermodynamics

S.L. CLEGG, A.S. WEXLER, P. BRIMBLECOMBE: Properties of acid ammonium sulphate aerosols at low temperature S535

H. ARSTILA, K. LAASONEN, A. LAAKSONEN: Ab initio study of small sulphuric acid–water clusters S537

D. IMRE, R. MCGRAW, JUN XU, S. OATIS: Liquid to liquid and critical nucleus to critical nucleus phase transitions in super-cooled droplets S539

M. SVANBERG, J.B.C. PETTERSSON: Protonated water clusters – structure and thermodynamics of $H^+(H_2O)_n$ ($n \leqslant 40$), and electron recombination: $H^+(H_2O)_n + e^-$ S541

M. SVANBERG, L. MING, N. MARKOVIC, J.B.C. PETTERSSON: Molecular dynamics simulations of binary collisions between water clusters S543

Session 5A: Environmental Aerosols

S. MATTHAS-MASER, V. OBOLKIN, T. KHODZER, R. JAENICKE: Seasonal variation of primary biological aerosol particles in the remote continental region of Lake Baikal/Sibiria S545

A. JUOZAITIS, A. LUGAUSKAS, L. SVEISTYTE, V. ULEVICIUS, K. WILLEKE, S.A. GRINSHPUN, T. REPONEN: Assessment of microorganism transfer from the Baltic sea waters to the atmosphere S547

C.C. CHEN, T.S. YU, T.S. SHIH: A computer simulation study of the overlapping effect on the bioaerosol/fibrous aerosol counting S549

E. ROBINE, D. DERANGERE, M. ATTOUI, R. MOREAU: Aerobiocontamination testing procedure for evaluation of building materials and surfaces hygienic properties S551

P.V. SCARPINO, H. QUINN: Bioaerosol distribution patterns adjacent to two swine-growing-finishing housed confinement units in the American Midwest S553

Session 5B: Atmospheric Number, Size and Mass III

G.A. KIRKMAN, S.J. PIKETH, G. HELAS, H.J. ANNEGARN, M.O. ANDREAE: Seasonal tropospheric aerosol characteristics over Southern Africa S555

C. LECK, E.D. NILSSON, E.K. BIGG: Processes controlling the distribution of aerosol particles in the summer Arctic marine boundary layer – an overview of the results from the Arctic ocean expedition, 1996 (AOE-96) S557

A. PETZOLD: F.P. SCHRÖDER, M. KUHN, C. HOELL: Characteristics of black carbon emission by air traffic S559

F. SCHRÖDER, A. PETZOLD, B. KÄRCHER: Ultrafine particulate jet aircraft emissions depending on fuel sulfur content and contrail processing S561

Session 5C: Cloud Condensation Nuclei (CNN)

A. LAAKSONEN, J. HIENOLA, M. KULMALA: Parameterization of the soluble trace gas effect on CCN activation S563

J.G. HUDSON, S.S. YUM, Y. XIE: Field measurements of the effects of cloud condensation nuclei on cloud microphysics in various environments S565

M. KULMALA, J.M. MÄKELÄ, I. KOPONEN, L. PIRJOLA: Formation of cloud condensation nuclei in boreal forest area S567

Session 5D: Inorganic Combustion Aerosols

SUYUAN YU, A.D. JONES, D.P.Y. CHANG, P.B. KELLY, I.M. KENNEDY: Chromium aerosol in a laminar premixed hydrogen – air flame S569

J. KURKELA, J. LATVA-SOMPPI, U. TAPPER, E.I. KAUPPINEN, J. JOKINIEMI: Fly ash particle formation in fluidized bed combustion of wood-based fuels S571

T. LIND, E.I. KAUPPINEN, T. VALMARI, G. SFIRIS, K. NILSSON, W. MAENHAUT: Ash transformations during fluidized bed combustion of willow and forest residue S573

S.B. DAVIS, J.O.L. WENDT: Interactions between toxic metal, sodium, and kaolinite/lime aerosols in combustion processes S575

T.G. LEE, P. BISWAS: Kinetics of mercury capture using titania sorbents S577

Session 5E: Heat and Mass Transfer

J. KÖRBER, K. SCHABER, R. EHRIG, P. DEUFLHARD: Modelling and simulation of aerosol formation in absorption processes S579

H. GRETSCHER, K. SCHABER: Formation of HCl aerosols in absorption processes S581

A.V. FILIPPOV, D.E. ROSNER: Particle-to-gas energy transfer during laser-induced incandescence (LII) S583

A.K. Ray, V. Devarakonda: Evaporation of multicomponent microdroplets of volatile constituents S585

K. Hämeri, R.J. Charlson, H.-C. Hansson, M. Jacobson: Hygroscopic properties of ammonium sulfate aerosol particles mixed with slightly soluble organic compound S587

Session 6A: Urban Aerosols

G.B. Raga, D. Baumgardner, G. Kok: On the microphysical and chemical properties of aerosols in Mexico City S589

K. Earnshaw, D.R. Booker: City centre and industrial pollution measurement using mass- and number-weighted instrumentation S591

P.I. Williams, T.W. Choularton, M.W. Gallagher, H. Coe, K.N. Bower: Results of monitoring ultra-fine, fine and accumulation mode particles above an urban canyon within the city of Manchester S593

G. Buzorius, K. Hämeri, J. Pekkanen, M. Kulmala: Correlation studies of urban aerosol number concentration S595

B. Wehner, A. Wiedensohler: Continuous measurements of number size distributions in an urban area: statistical analysis S597

Session 6B: Bioaerosol Analysis

W.D. Griffiths, I.W. Stewart: The effect of aerosolisation parameters and additives on bioaerosol viability S599

A.G.E. Saum, R.H. Cumming, F.J. Rowell: Novel AC impedometric method for protease detection in air S601

M.L. Laucks, E.J. Davis: Chemical characterization of single pollen particles via fluorescence and Raman spectroscopy S603

Wen-Hai Lin, Chih-Shan Li: Effects of storage time on the recovery of ariborne fungal spores samples S605

I.L. Holwill, J.M. Clark, J.E. Swanton, W.D. Griffiths, I.W. Stewart: Characterisation of bioaerosols: the effects of environmental conditions and pollutants S607

Session 6C: Atmospheric Particle Formation I

B. Verheggen, M. Mozurkewich: Observation of a SO_2 induced nucleation event in the atmosphere S609

C.D. O'Dowd, D.J. Creasey, M. Geever, G. McFiggens, D.E. Heard, J.D. Lee, M.J. Pilling, B.J. Whitaker, M.H. Smith, M.K. Hill, S.G. Jennings: Concurrent measurements of OH and ultra-fine particles in the coastal atmosphere S611

J.J. Corbett, K.P. Capaldo, S.N. Pandis, P. Kasibhatla: Global sulfur emissions inventories for oceangoing ships and their impact in global chemical transport models S613

T. Berndt, O. Börge, G. Spindler, W. Birmili, E. Stratmann: On the role of H_3NSO_3 for the formation of new particles S615

Session 6D: Carbonaceous Combustion Aerosols

M. Kasper, K. Sattler, K. Siegmann, U. Matter: The effect of ferrocene addition on particle formation and burnout in combustion processes S617

K. Siegmann, L. Scherrer, H.C. Siegmann: Characterization of combustion aerosols using two in-situ sensors S619

K. Urashima, T. Ito, J.S. Chang: Morphology of aerosol particles formed by a superimposed barrier discharge reactor during the combustion flue gas NO_x removal process S621

C.M. Sorensen, W.B. Hageman, T.J. Rush, H. Huang, C. Oh: Aerogelation in a flame soot aerosol S623

Th. Kauffeldt, A. Schmidt-Ott: Investigation of the influence of exhaust aftertreatment on the particulate phase in diesel exhaust gases S625

Session 6E: Instrumentation IV: Specific Particle Type

E. Hirst, P.H. Kaye, S. Saunders, D.W. Johnson, M.A. Pickering: Characterising atmospheric cloud particles using spatial light scattering S627

R. Kotzick, R. Niessner: Atmospheric black carbon measurements using photoacoustic spectroscopy S629

F.J. Rowell, Z.-F. Miao, R.H. Cumming: A new rapid and sensitive method for monitoring potentially hazardous agents in aerosols S631

H.T. Brink, A. Waijers-Ijpelaan, S. Slanina: Performance of an automated thermodenuder for ammonium nitrate measurements S633

M. Hagström, J.B.C. Pettersson: Detection of single salt particles by surface ionization at atmospheric pressure S635

Special Session: Gas Molecule Interaction with Aerosol Surfaces: Sticking Probabilities and Reaction Rates

U. Baltensperger, M. Ammann, M. Kalberer: Gas molecule interaction with aerosol surfaces: sticking coefficients and reaction rates: basic properties S637

Ch. George, Ph. Mirabel: Uptake rate – measurements and values on bulk materials S639

K.P. Capaldo, S.N. Pandis: Sticking probabilities: applications in atmospheric aerosol modelling S641

M.J. Gillan, I.J. Ford, C.F. Clement: Molecule–surface interactions: theory in surface science S643

R. Rudolf, A. Vrtala, P.E. Wagner: Determination of gas molecule sticking probabilities from the growth kinetics of microdrops S645

Special Session: On Some Peculiarities in the History of Aerosol Science

K.R. Spurny: On some peculiarities in the history of aerosol science S647

Part 2

Poster Session 2

Atmospheric Aerosols: Optical Properties

G.C. Asnani, M.K. Rama Varma Raja, P. Salvekar: Aerosol layer near tropical tropopause S649

C.T. Lee, J. J. Tsai: Aerosol light-scattering coefficients and size distributions in a suburban area in Taiwan S651

A. Zieliński, T. Zieliński, J. Piskozub: Vertical distribution of aerosols in coastal areas of the Southern Baltic sea S653

M.Z. Jacobson: Isolating the causes and effects of large ultraviolet irradiance reductions in Los Angeles S655

M. Weller, E. Schulz, U. Leiterer, T. Naebert, A. Herber, L.W. Thomason: Results of ten years of aerosol optical dept in Germany S657

Jianliang Yang, Mingxing Wang: Direct shortwave radiative forcing by desert aerosol from Eastern and Central Asia S659

Ü. Kikas, A. Mirme, E. Tamm: Examining the relationship between aerosol size distribution and atmospheric visibility in an urban area S661

Y. Iwasaka, T. Shibata, S.-A. Kwon, H. Adachi: Types of polar stratospheric cloud particles measured with lidar at NY-Ålesund, Norway in winter of 1994/1995: Discreminant analysis of lidar returns S663

S.-A. Kwon, Y. Iwasaka, K. Matsunaga, T. Shibata: Seasonal changes of aerosol distribution in the free troposphere: Lidar measurement at Nagoya, Japan S665

R. Höller, H. Horvath, M. Kasahara: Optical characterisation of the urban atmospheric aerosol at Kyoto S667

C. Flamant, J. Pelon, P. Chazette, V. Trouillet: Marine aerosol vertical distribution retrieval using airborne backscatter lidar measurements S669

D. Paronis, F. Dulac, P. Chazette, E. Hamonou, G.L. Liberti: Aerosol optical thickness monitoring in the mediterranean S671

C. Pandithurai, P.C.S. Devara, R.S. Maheskumar, P. Ernest Raj, K.K. Dani: Investigations of QBO in lidar-observed boundary layer aerosols over an Indian urban station S673

H.M.Ten Brink, A. Hensen: Light-scattering data relevant for aerosol radiative forcing S675

Atmospheric Aerosols: Physical Properties II

P. Aalto: Particle size distributions from high arctic S677

C. Roth, E. Karg, J. Heyder: Do inhaled ultrafine particles cause acute health effects in rats? I: Particle production S679

R.E. Hillamo, M. Aurela, T. Mäkelä, V.-.M. Kerminen, C. Leck: Mass size distributions of major ionic species during AOE-96 S681

V. Ulevicius, D. Sopauskiene, A. Juozaitis, K. Zeromskiene, S. Stapcinskaite: The effect of chloride depletion of coarse sea-salt particles on atmospheric deposition at Lithuanian coastal site S683

M. Kriews, O. Schrems: Aerosol sampling depending on precipitation at Spitsbergen S685

G.A. Ferron, B. Busch, J. Heyder, L. Krämer, R. Kotzick, R. Niessner: Hygroscopic and heterogeneous condensation properties of soot aerosol particles S687

A.M. King, S. Dorling: Comparisons of non-urban and urban network levels of particulate matter, and meteorological data S689

J.H. Tsai, J.C. Chen, Y.C. Hsu: The particulate characteristics of indoor and outdoor air in Tainan city S691

A. Minikin, O. Schrems: Studies of the mass and number size distributions of coastal antarctic aerosol S693

G.D. Leeuw, E. Vignati: Aerosol particle size distributions at a rural coastal site S695

T. Petelski, M. Chomka: The marine aerosol over the coastal zone S697

T. Petelski: Marine aerosol over the Nordic seas S699

Meng-Chen Chung, I. Colbeck: Ambient aerosol measurements at the road side S701

D.M. Garvey: Behavior of the fine and coarse particle modes in the boundary layer over a desert basin S703

A. Keil, A. Wiedensohler, M. Wendisch: Enhanced particle number concentration at the top of stratiform boundary layer clouds S705

J. Heintzenberg, A. Wiedensohler, T. Conrath, S. Kütz, R. Dubois: Modification of a commercial condensation particle counter for boundary layer balloon-borne aerosol studies S707

E. Vrins, H.G. Merkus, J. Marijnissen, B. Scarlett: Monitoring and control of fugitive coarse dust sources S709

S. Nyeki, M. Kalberer, F. Schröder, A. Petzold, E. Weingartner, M. Lugauer, I. Colbeck, U. Baltensperger: Condensation nuclei (CN) and ultrafine CN in the free troposphere to 12 km above the Jungfraujoch station S711

M.B. Meyer: The measurement of particulate matter What is truth? S713

A. Khlystov, G.P.A. Kos, H.M. Ten Brink, H. Russchenberg, V. Venema, M. Kulmala: Estimation of supersaturation in a stratocumulus cloud from combined airborne and ground measurements S715

A. Khlystov, G.P.A. Kos, H.M. Ten Brink, C. Kruisz, R. Hitzenberger, A. Berner: An indirect measurement of cloud activation properties of ambient black carbon particles S717

R. Hitzenberger, A. Berner, H. Giebl, R. Kromp, A. Rouc, A. Koch, S. Marischka, H. Puxbaum: Cloud condensation nuclei (CCN) and aerosol mass size distributions at an European background and an urban site S719

R.F. Rakhimov: Non-additive absorption of light by atmospheric haze particles included into liquid-droplet clouds S721

Yu.A. Pkhalagov, V.N. Uzhegov, N.N. Shehelkanov: Aerosol extinction of optical radiation under the smoke smog conditions S723

V.V. Smirnov, M.A. Novitski: Mesoscale transport of dust stream S725

Atmospheric Aerosols: Chemical Properties II

G. Roberts, M.O. Andreae, W. Maenhaut, M.-T. Fernández-Jiménez: Inorganic composition and sources of aerosols in a Central African rainforest during the dry season S727

J. Turšič, M. Bizjak, M. Lešnjak: Chemical characterisation of aerosols at remote location in Slovenia S729

S. Zappoli, A. Andracchio, S. Fuzzi, M.C. Facchini, A. Gelencsér, G. Kiss, Z. Krivácsy, Á. Molnár, T. Barcza, E. Mészáros, H-C. Hansson, K. Rosman, Y. Zebühr: Organic components and chemical mass balance of fine aerosol in different areas of Europe S731

F. Chiminello, P. Mittner, D. Ceccato: A multiannual experiment on tropospheric aerosol at Terranova bay (Antarctica): Principal components, elemental ratios and enrichment factors S733

M. Kriews, O. Schrems: Spatial distribution of trace elements in aerosols over the Atlantic ocean S735

B.S. Smolyakov, L.A. Pavlyuk, V.I. Makarov, K.P. Koutsenogii: Influence of biomass burning on changes ionics composition and carbonaceous in aerosols of West Siberia S737

J. PAATERO, J. HATAKKA, Y. VIISANEN: Variations of particle-bound Radon-222 progeny in Northern Finland due to vertical mixing of the lower troposphere S739

D. CACERES, M. ADONIS, L. GIL, A.H. MIGUEL: Exhaust PAH in Chilean vehicles: Levels, source signatures and receptor modeling S741

N. STREIT, E. WEINGARTNER, M. SCHWIKOWSKI, H.W. GÄGGELER, U. BALTENSPERGER: Characterization of size-fractionated aerosol from the Jungfraujoch (3580 m asl) using total reflection X-ray fluorescence (TXRF) S743

MENG-CHEN CHUNG, I. COLBECK: Ion composition of atmospheric aerosol at South Eastern England S745

M. STIKANS, M.J. GATARI, E.S. LINDGREN, M. ÖBLAD, D.M. MAINA: Study of trace metals in background aerosols of urban and rural Kenya, Africa S747

A.M. DILLNER, S.M. LARSON, A.H. OMAR: Characterization of a rural aerosol and its resulting radiative forcing S749

R. HITZENBERGER, S.G. JENNINGS, S.M. LARSON, A. DILLNER, H. CACHIER, Z. GALAMBOS, A. ROUC, T.G. SPAIN: Method intercomparison for the determination of black carbon content in aerosols S751

A. EVEN, A. SMEKENS, A. KHLYSTOV, P. BERGHMANS, R. VAN GRIEKEN, H.M. TEN BRINK: Morphology of internally mixed aerosol of ammonium sulfate and soot S753

Pharmaceuticals

F. PODCZECK: Relationship between centrifugal adhesion measurements and aerosol performance of dry powder inhalations S755

T. SRICHANA, A. BRAIN, G.P. MARTIN, C. MARRIOTT: The determination of drug-carrier interactions in dry powder inhaler formulations S757

MOTOICHI SATO MD: A new nasal 2 way nebulizer for nasal allergy S759

T. SRICHANA, G.P. MARTIN, C. MARRIOTT: Calibration method for the Andersen cascade impactor S761

G.A. FERRON, C. ROTH: A heat conservation model to estimate the temperature of aerosols from a jet nebulizer S763

I. COLBECK, J. AMASS: Dispersive interparticle forces-pharmaceutical aerosols S765

I. COLBECK, J. AMASS: Polarisation interparticle forces-pharmaceutical aerosols S767

Bioaerosols

D. SYKES, R.H. CUMMING, F.J. ROWELL, L.X. TANG: Cyclones and the collection of bioaerosols: Problems and prospects S769

S. GRUBER, S. MATTHIAS-MASER, J. BRINKMANN, R. JAENICKE: Vertical distribution of biological aerosols particles above the North Sea S771

E.J. GILBERT, C.W. WARD: The dispersal of bioaerosols from composting facilities S773

WEN-HAI LIN, CHIH-SHAN LI: Collection efficiency and bioefficiency of the AGI-30 impinger for fungal bioaerosols S775

P.V. SCARPINO, N.J. JENSEN, P.A. JENSEN, R. WARD: The use of ultraviolet germicidal irradiation (UVGI) in disinfection of airborne bacteria and rhinoviruses S777

C.M. KENNY, S.G. JENNINGS: Background bioaerosol measurements at mace head S779

N.N. BELOV, N.G. BELOVA: Novel approaches for high effective, quasi real-time bioaerosol sampler S781

Modelling

A.A. LUSHNIKOV, M. KULMALA: Periodic regimes in condensing aerosols S783

T.G. REISIN, S.C. WURZLER, A. BOTT: A new insight into cloud-aerosol interactions: numerical simulations using a two-dimensional distribution function S785

K. LITTFIN: Validation of averaged meteorological profiles for use in the naval oceanic vertical aerosol model S787

H. BUNZ, O. MÖHLER, U. SCHURATH, R. TIEDE: Behaviour of H_2SO_4/H_2O droplets under stratospheric conditions dependence on relative humidity and temperature S789

Y.P. KIM, S.G. SHIM, M.K. CHOI: Interactions between $CaCO_3$ in Eolian dust and ambient SO_2 S791

J. YANG, R. JAENICKE, V. DREILING, T. PETER: Rapid condensational growth of aerosol particle in air stream-numerical simulation S793

S. WURZLER, A. BOTT, C. SPRENGARD-EICHEL, M. KRÄMER, S. MATTHIAS-MASER: The influence of the biological and the water-soluble fraction of aerosol particles on cloud microphysics: Numerical case study for a marine situation S795

K.P. CAPALDO, C. PILINIS, S.N. PANDIS: Dynamic aerosol mass transfer in atmospheric models S797

R.K. MEYER, I.J. ACKERMANN, H. HASS, A. EBEL: Modeling of aerosol dynamics with MADE: Cloud contributions S799

E. VIGNATI, F. RAES, R. BERKOWICZ: Internal and external mixing of aerosols in the H_2O–H_2SO_4 and soot system S801

E.D. NILSSON, M. KULMALA, C. LECK, D.O. REVELLE, P. AALTO, K. BIGG: Nucleation, growth and vertical layering on the sub micrometer aerosol in the cloud free boundary layer over the central Arctic ocean S803

N. KANEYASU, H. YOSHIKADO, S. YAMAMOTO: Wide-ranged measurement and dispersion modeling of elemental carbon during a heavy pollution episode over Tokyo metropolitan area, Japan S805

V.F. RAPUTA, T.V. KHODZHER, A.G. GORSHKOV, K.P. KOUTZENOGII: Aerosol falls on snow cover on the outskirts of Siberian towns S807

S.N. TRIPATHI, R.G. HARRISON: Dry deposition of electrically charged aerosols S809

M. CHOMKA, T. PETELSKI: Sea bed's characteristic as a factor determining the aerosol emission over the coastal zone S811

S. SHIBA, S. KATO, Y. HIRATA, S. YAGI: Non-steady growth and temperature variation of water-droplet on condensation nucleus $(NH_4)_2SO_4$ S813

N.N. BELOV, P.N. BELOV: Method of probe particles for PC modelling of the aerosol dispersion in turbulence atmosphere for complicated landscape S815

Aerosol Physics: Aerosol Dynamics

D.A. GUBAIDULLIN: Sound propagation in polydispersed air fogs S817

J.M. FERNÁNDEZ DÍAZ, M.A. RODRÍGUEZ BRAÑA, P.J. GARCÍA NIETO, C. GONZÁLEZ-POLA MUÑIZ, B. ARGANZA GARCÍA: Analytic solution of the generally mixed aerosol dynamic equation without coagulation S819

J.M. FERNÁNDEZ DÍAZ, C. GONZÁLEZ-POLA MUÑIZ, M.A. RODRÍGUEZ BRAÑA, B. ARGANZA GARCÍA, P.J. GARCÍA NIETO: A numerical flux-based method of characteristic to solve the internally mixed multicomponent aerosol evolution without coagulation S821

K. JURSKI, E. GÉHIN: Splitting and coalescence criteria of droplets in a turbulent flow in a nozzle S823

L. PIRJOLA, M. KULMALA, A. BISCHOFF, M. WILCK, F. STRATMANN: Effects of aerosol dynamics on the formation of sulphuric acid aerosols S825

M. YU. GLADKOV, U. HEINZ: Dynamics of a finely dispersed particle suspended in a gas S827

Aerosol Physics: Transport and Deposition

B. ASGHARIAN, M.N. GODO: Size separation of spherical particles and fibers in a centrifuge S829

J. PYYKÖNEN, R. PAAVILAINEN, J. JOKINIEMI: Estimating deposition velocities in a slagging prediction scheme S831

K.-H. AHN, J.H. AHN: Numerical simulation of particle motion through a critical orifice S833

O. LASTOW, B. ULLBRAND, A. GUDMUNDSSON: Using computational fluid dynamics to determine impactor penetration efficiency S835

J. MALET, L. ALLOUL, D. BOULAUD: Influence of tube surface roughness on nanoparticle deposition in turbulent flow S837

Aerosol Physics: Electrical Behaviour

M. ADACHI, T. ISHIDA, T. O. KIM, K. OKUYAMA: Effects of NH_3 on particle formation from NO_2/H_2O/air and SO_2/H_2O/air mixtures by α-ray radiolysis S839

D.M.A. CAMELOT, D. BRUNNER, R.P.M. HARTMAN, J.C.M. MARIJNISSEN, B. SCARLETT: Mechanisms of jet break-up for EHDA in the cone-jet mode S841

R.G. HARRISON: The atmospheric significance of S843

P. PARIS, A. MIRME, M. LAAN: Study of corona discharge aerosol with an electrical aerosol spectrometer S845

M.H. MAGNUSSON, K. DEPPERT, T. KRINKE: Thermal charging of metal nanoparticles S847

U. HÕRRAK, A. MIRME, J. SALM, E. TAMM, H. TAMMET: Study of covariations of aerosol and air ion mobility spectra at Tahkuse, Estonia S849

F. GENSDARMES, D. BOULAUD, A. RENOUX: Aerosol charging under gamma irradiation S851

Instrumentation: Monitoring

T. ZIELIÑSKI, M. CHOMKA, J. PISKOZUB, T. PETELSKI: Verification of different techniques for the measurement of marine aerosols in coastal areas S853

A.L. VLASENKO, A.N. ANKILOV, A.M. BAKLANOV, S.I. EREMENKO: Measurement of ammonium sulphate aerosol concentration S855

A. MICALLEF, J.J. COLLS: Measuring vertical concentration profiles of airborne particulate matter within the breathing zone: Problems and solutions S857

H. CHEIN, T-Y. HUANG, C-J. TSAI: Development of a confined pulse-jet particle cleaning technology for semiconductor wafers S859

A.P. FEWS, D.L. HENSHAW: A novel aerosol detector for personal monitoring or fixed location use S861

A.L. NICHOLS, P.M. READ, D.R. BOOKER: Valid analytical measurements: Particulates and aerosols S863

B. XU, R. VEHRING, G. SCHWEIGER: Identification of the cristalline phase of single levitated microparticles S865

SEONG-HO YOO, KEUNG-SHAN WOO, B.Y.H. LIU: Primary particle and agglomerate size measurement in chemical mechanical polishing (CMP) slurry using electrospray technique S867

K.L. APLIN, R.G. HARRISON, S. WILKINSON: An electrical method of urban pollution measurement S869

G. FRANK, S.-I. CEDERFELT, B.G. MARTINSSON: A method for studies of the interaction between atmospheric aerosol particles and cloud and fog droplets S871

A. EVEN, A. KHLYSTOV, H.M. TEN BRINK: Performance of two ambient carbon particulate monitors in background air S873

A.V. SAVCHENKO, V.V. SMIRNOV, A.A. PRONIN: Mobile apparatus for high dispersed aerosol investigations S875

H.M. TEN BRINK, G. STEGEMAN, R.P. OTJES, P. HOFSCHREUDER: A droplet tunnel sampler with on-line ion A S877

Aerosol Chemistry

G.I. SKUBNEVSKAYA, E.N. DULTSEV, G.G. DULTSEVA, S.N. DUBTSOV: Generation rates and properties of aerosols formed under UV photolysis of acetaldehyde and benzaldehyde vapour S879

N.A. CLEGG, C.D. O'DOWD, M.H. SMITH, J.A. LOWE: Sulphate partitioning in marine aerosol S881

A. TRIMBORN, K.-P. HINZ, H. IGLSEDER, M. GREWELING, B. SPENGLER: Characterisation of mineral dust samples using bipolar on-line laser mass spectrometry S883

E. NEMITZ, M.A. SUTTON, T.W. CHOULARTON, P.G. WYERS, R.P. OTJES: Investigations into vertical gradients of the gas–aerosol phase equilibrium $NH_{3(g)}$–$NH^{+}_{4(s,aq)}$ above vegetative surfaces S885

M. MOORE, B. GORBUNOV, I. WILLIAMS: A new method to study interaction of semi-volatile and volatile compounds with aerosol particles S887

H. SAATHOFF, S. KAMM, O. MÖHLER, K.-H. NAUMANN, U. SCHURATH: Kinetics and mechanism of the heterogeneous interaction of ozone with soot aerosol S889

T.-E. PARTS: Experimental evidence of dimers, trimers and tetramers in cluster ions S891

S. MATSUZAWA, L. MOEINI-NOMBEL, L. NASSER-ALI: Effect of soil component and rain water on phtodegradation of polycyclic aromatic hydrocarbons in deposited diesel particulate matters S893

A. TAKAMI, A. KADO, S. KODA: Measurement of uptake coefficient of I_2 to the aqueous surface S895

Materials

HEE DONG JANG: Generation of silica nanoparticles from TEOS vapor in the diffusion flame S897

R.I. VIITALA, M. BURGOS, C. COUTIER, M. LANGLET: Doped TiO_2 coatings made by aerosol-gel process S899

B.R. FORSYTH, B.Y.H. LIU: Particle charge distribution measurement in exhaust gases of plasma enhanced processing equipment S901

JUI-CHEN LIN, J.W. GENTRY: Development of particle morphology of drying drops containing dissolved and suspended solids S903

K. SAKIYAMA, M. ITOH, H. TAKANO, S. AONO: Characterization of the thin film prepared at room temperature by QDPD S905

K. OKUYAMA, M. SHIMADA, T. FUJIMOTO, T. MAEKAWA, K. NAKASO, T. SETO: Effects of preparation conditions on the characteristics of titanium dioxide particles produced by a CVD method S907

S.B. PARK, Y.C. KANG, I.W. LENGGORO, K. OKUYAMA: Preparation of Y_2O_3:Eu phosphor without post-treatment by gas phase reaction S909

Y.C. KANG, S.B. PARK, I.W. LENGGORO, K. OKUYAMA: Preparation of non-aggregation YAG-Ce phosphor particles by spray pyrolysis S911

Q.A. PANKHURST, P. ALLEN, N.S. COHEN, I. COLBECK, G.D. FORSTER, D. JEFFERY: Fine particle iron oxide prepared by aerosol pyrolysis of the iron storage protein ferritin S913

Y. KAMLAG, I. COLBECK, C.H. CHEN, J. SCHOONMAN: Spray pyrolysis of (super) conductors S915

P. MORAVEC, J. SMOLÍK, V.V. LEVDANSKY: Heterogeneous fine particle synthesis by CVD method S917

A.M. BAKLANOV, V.S. KOZLOV, M.V. PANCHENKO, A.N. ANKILOV, A.L. VLASENKO: Generation of soot particles in submicron range S919

D. RETTIG, P. MERKER, H. NITSCHE: Particle emission from UV-irradiated silica surfaces S921

E.M. PRIN, M.A. GLIKIN, D.A. KUTAKOVA, TH. KAUFFELDT: Catalyst aerosol flow reactor for industrial application S923

Filtration

Y.J. KIM, S.H. JEONG, W.S. HONG, B.K. HA, S.S. CHO, B.H. HAM: Effect of energization on the particle collection in a bench-scale cylindrical electrostatic precipitator S925

L. GRADOŃ, H. LUCKNER, A. PODGÓRSKI, Z. WERTEJUK: Separation of neutral and charged aerosol particles in cyclones with external electric field S927

A. PODGÓRSKI: Macroscopic model of two-stage aerosol filtration in a fibrous filter without reemission of deposits S929

A. PODGÓRSKI, L. GRADÓN, H.J. LUCKNER: Investigations on the deposits reemission in fibrous filters S931

S. DHANIYALA, B.Y.H. LIU: Experimental investigation of filter inhomogeneity by local efficiency measurements S933

T. CIACH, L. GRADOŃ: Multilayer fibrous filters with varied porosity and fibre diameter S935

A. THORPE, R.C. BROWN: Performance of textile and paper filters with bimodal fibre size distributions S937

D.C. WALSH: Possibilities for the design of fibrous filter materials with enhanced dust holding capacity S939

Session 7A: Health Effects

Y.S. CHENG, H.C. YEH, S.M. K.H. CHENG, D.L. SWIFT: Deposition of ultrafine particles in the nasal airways S941

W. HOFMANN, R. BERGMANN, M.G. MÉNACHE: The effect of intersubject variability in air on intersubject variations in particle deposition S943

I. BALÁSHÁZY, W. HOFMANN: Quantification of localized particle deposition patterns in human airway bifurcations S945

R. BERGMANN, E. HOFMANN, J.S. FLEMING, J.H. CONWAY: Simulation of three-dimensional particle deposition patterns S947

T. BELLANDER, A. HADENIUS, L. JÄRUP: Assessment of the particle exposure level for the total population of Stockholm county S949

Session 7B: Vehicle Emissions I

U. MATTER, J. PAUL, L. SCHERRER, K. SIEGMANN: Dynamic characterization of diesel particulate emissions using two portable sensors S951

M. MOHR, C. BACH: Fine particle emission from diesel and gasoline vehicles at constant and transient conditions S953

H. BURTSCHER, U. MATTER, G. SKILLAS, Q. ZHIQI: Particles in diesel exhaust caused by fuel S955

S.M. WALL: Comparison of a new automated dilution sampler with the conventional EPA source test method for measuring PAH in diesel combustion aerosol S957

JI PING SHI, R.M. HARRISON: Study of ultrafine aerosol emitted from a modern diesel engine S959

Session 7C: Instrumentation V: Monitoring and Generation

P. LILIENFELD, R. STEG: Mass sensing by filter disc resonance: a progress report S961

H.M. TEN BRINK, A. KHLYSTOV, G.P.A. KOS, W. KREYLING, C. ROOD, T. TUCH: The "wetness" of ambient aerosol and its influence on sizing and collection S963

J.R. BOTTIGER, P.J. DELUCA, E.W. STUEBING, D.R. VANREENEN: An ink jet aerosol generator S965

F. SCHMIDT, J. DIXKENS, H. FISSAN: Production of defined fibrous particles characterisation with dark field microscope S967

A. SCHMIDT-OTT: Monitoring particulate air pollution by conventional sensors S969

Session 7D: Electrical Behaviour I

A.B. VATAZHIN, V.A. LIKHTER, V.I. SHUL: Formation of charged aerosols due to the mechanical destruction of metal S971

S. DHANORKAR, A.K. KAM: Effect of coagulation on the aerosol charge distribution S973

A.M. GAÑAN-CALVO: The universal nature and scaling law of the surface charge electrospraying S975

R.P.A. HARTMAN, D.J. BRUNNER, J.C.M. MARIJNISSEN, B. SCARLETT: Scaling laws for droplet size and current produced in the cone-jet mode S977

D.M.A. CAMELOT, J.P. BORRA, J.C.M. MARIJNISSEN, B. SCARLETT: Bipolar coagulation: charge distribution of coagulated droplets S979

Sesstion 7E: Heterogeneous Chemistry I

O.P. HAEFLIGER, T.D. BUCHELI, R. ZENOBI: Time-resolved analysis of particle-bound aromatic compounds in urban air using two-step laser mass spectrometry S981

K.G. DASSIOS, S.N. PANDIS: Evaporation of ammonium nitrate aerosol and the effect of organic coatings S983

E. SWARTZ, Q. SHI, P. DAVIDOVITS, T. T. JAYNE, D. R. WORSNOP, C. E. WKLOB: Uptake of gas-phase ammonia by aqueous/aqueous acid solutions S985

D.R. WORSNOP, J.T. JAYNE, C.E. KOLB, Q. SHI, J. BONIFACE, Y.Q. LI, O.V. RATTIGAN, E. SWARTZ, P. DAVIDOVITS: Uptake of gas-phase SO_2, H_2S and CO_2 into droplets and bubbles in aqueous acid solutions S987

H. HERRMANN, B. ERVENS, CHR. NEUSÜß, F. WICKTOR, A. REESL: Free radical chemical conversions within aqueous aerosols S989

Session 8A: Environmental Health Effects

H. HAUCK, O. PREINING: PM related health hazards-the Austrian way S991

J. HIENOLA, A. LAAKSONEN, M. KULMALA: Supercooled and frozen cirrus cloud properties affected by gaseous nitric acid S993

A. ZIESENIS, E. KARG, R.E. KORBEL, W.G. KREYLING, K.L. MAIER, S. OSTERMAIER, C. ROTH, H. SCHULZ, S. TAKENAKA, J. HEYDER: Do inhaled ultrafine particles cause acute health effects in rats? III: Biological responses S995

W. HADNAGY, R. STILLER-WINKLER, E. KAINKA, U. RANFT, H. IDEL: Influence of urban particulate air pollution (PM10; PM2.5) on the immune system of children S997

P. KOUTRAKIS, J.M. WOLFSON, S.T. FERGUSON: Development of a coarse particle concentrator for inhalation exposures S999

Session 8B: Vehicle Emiisions II

Z.D. RISTOVSKI, L. MORAWSKA, N.D. BOFINGER, J. HITCHINS: Emission of submicrometer particles from spark ignition vehicles S1001

J. LYYRÄNEN, J. JOKINIEMI, E. KAUPPINEN, J. JOUTSENSAARI, A. AUVINEN: Particle formation in medium speed diesel engines operating with heavy fuel oils S1003

R.A. ZAHORANSKY, H.W. KUHNT, E. LAILE, G. POSS: Particle emission of internal combustion engines under transient load conditions-on-line analysis of particle size and concentration by optical extinction S1005

J. KESKINEN, A. VIRTANEN, P. AHLVIK, L. NTZIACHRSTOS: Estimation of effective density of diesel particles S1007

Session 8C: Atmospheric Particle Formation II

R.J. WEBER, P.H. MCMURRY, F.L. EISELE, L. MAULDIN, D. TANNER: Evidence for new sulfate particle formation in the remote troposphere involving biogenic trace gas species S1009

A. CLARKE, F. EISELE, V. KAPUSTIN, K. MOORE, L. MAULDIN: Nucleation in the remote troposphere S1011

I. TEGEN, R. MILLER: Climate effect of soil dust aerosols S1013

W. BIRMILI, A. WIEDENSOHLER: The influence of meteorological parameters on ultrafine particle production at a continental site S1015

Session 8D: Electrical Behaviour II

J. PORSTENDÖRFER, V. DANKELMANN, A. REINEKING: Neutralization of ^{218}PO-clusters in air S1017

J.F. BARLOW, R.G. HARRISON: Turbulent transfer of charged aerosol in the atmospheric surface layer S1019

F.E. KRUIS, F. OTTEN, F. JORDAN, H. FISSAN: A new efficient unipolar charger for nanoparticles S1021

DA-REN CHEN, D.Y.H. PUI: A novel charger for nanometer aerosols S1023

P.U. ANDERSSON, A. TOMSIC, J.B.C. PETTERSSON: Decomposition and charging of nanometer ice particles by surface collisions S1025

Session 8E: Heterogeneous Chemistry II

C.T. LEE, W.C. HSU: On the additive property of water uptake for a mixed salt S1027

I. GRGIĆ, M. POZNIČ: Water soluble fraction of iron and oxalate in atmospheric aerosols and its effect on SO_2 oxidation S1029

M. AMMANN, M. KALBERER, F. ARENS, V. LAVANCHY, H.W. GÄGGELER, U. BALTENSPERGER: Nitrous acid formation on soot particles: Surface chemistry and the effect of humidity S1031

K.-H. NAUMANN, S. KAMM, O. MÖHLER, H. SAATHOFF, U. SCHURATH: Heterogeneous chemistry of nitrogen oxides and ozone on the surface of soot agglomerates S1033

Session 9A: Sampling I: Environmental

M.H.E. BALL, A.M. TOPE: Performance of a diluter for ultrafine aerosols and its use in determining the efficiency of a condensation particle counter S1035

S.V. HERING, R. VANDERPOOL, S. TEFFERA, A.H. MIGUEL: Field evaluation of FRM $PM_{2.5}$ samplers in Azusa, California S1037

C.B. KIDWELL, J.M. ONDOV, C. SIOUTAS, P. KOUTRAKIS: Ambient aerosol concentration by condensation and virtual impaction for collection and chemical analysis S1039

M. FURUUCHI, H. FISSAN, J. HORODECKI: Evaporation behavior of volatile particles on fibrous filter S1041

J.M. CLARK, S.R. PRESTON, D. SHAKESHAFT, D.K. DAVIES: The design, modelling and experimental investigation of a new electrostatic particle-in-water collection system for sub-micrometer particles S1043

Session 9B: ACE-2I

A.J. DORE, D.W. JOHNSON, T.W. CHOULARTON: A model of aerosol modification due to aqueous phase chemical reactions in stratocumulus clouds S1045

P. FORMENTI, M.O. ANDREAE, J. LELIEVELD: Saharan dust occurrence at a mid tropospheric site in Tenerife S1047

J.P. PUTAUD, R. VAN DINGENEN, M. MANGONI, A. VIRKKULA, F. RAES: Mass balance of the aerosol submicron fraction in the marine boundary layer at Tenerife during ACE-2 S1049

P. LAJ, S. FUZZI, M.C. FACCHINI, L. RICCI, G. ORSI, A. BERNER: Chemical properties of clouds during ACE-2 S1051

C. NEUSÜß, A. THOMAS, B. GERLACH, T. GNAUK, E. BRÜGGEMANN, H. HERRMANN: The chemical composition of the size-segregated atmospheric aerosol in Sagres (Portugal) during ACE-2 S1053

Session 9C: Modelling I: Atmospheric Aerosol Formation

B. GORBUNOV, A. BAKLANOV, N. KAKUTKINA, R. TOUMI, H.L. WINDSOR: Ice nucleation on soot particles S1055

L. PIRJOLA: Effects of the increased UV radiation and biogenic VOC emissions on ultrafine aerosol formation S1057

E.D. NILSSON, L. PIRJOLA, M. KULMALA: The potential for atmospheric waves to enhance the aerosol nucleation rate S1059

J.L. GRENFELL, R.M. HARRISON, A.G. ALLEN: Towards developing a predictive capacity for rapid nanoparticle formation events in the boundary layer S1061

V. JAENISCH, F. STRATMANN, D. NILSSON, P.H. AUSTIN: Influence of turbulent mixing processes on new particle formation rates S1063

Session 9D: Transport and Hydrodynamics I

Q. ZHOU, D. BURFOOT: Droplet dispersion in chemical fogs S1065

J.E. BROCKMANN, R.C. DYKHUIZEN, R. COTE, T. ROEMER: Aerodynamic focusing of large particles S1067

P.L. GARCIA-YBARRA, J.L. CASTILLO, D.E. ROSNER: Asymptotic analysis of the drag on a porous sphere S1069

A.M. GAÑAN-CALVO: A perfectly steady fluid micro-thread finds its way through a microscopic hole without touching its walls. The tale of a new nebulizer/emulsifier S1071

M.S.P. GOMES: Investigation on the effect of the coherent flow structures in the dispersion of fine particles around a Bluff body S1073

Session 9E: Filtration I: Industrial

I.E. AGRANOVSKI, T. MYOJO, R.D. BRADDOCK: Bubble filtering through porous media S1075

D. BEMER, R. REGNIER, S. CALLE: Measurement of the fractional efficiency of an industrial dust separator using a fluorescent aerosol S1077

C.-J. TSAI, H.-C. LU: Design and operation of a pilot-scale pulse-jet baghouse S1079

W.-J. LEE, S.J. CHEN, M.C. LIOW, L.C. WANG, K.L. HUANG: Removal efficiencies of PAHs by the electrostatic precipitator and wet scrubber S1081

V. GALPERIN, M. FICHMAN, S. BRODETSKI, M. SHAPIRO: Testing of industrial air filters and cyclones during their continuous operation S1083

Plenary: Advances in Aerosol Sampling Sciences and its Practical Applications

J.H. VINCENT: Advances in aerosol sampling science and its practical applications S1085

Session 10A: Sampling II: Cyclones

L.C. KENNY, J. THOMPSON: Experimenal investigation of a modular cyclone S1087

A.D. MAYNARD: Modelling axial flow cyclone performance S1089

S.H. HUANG, C.Y. LAI, C.C. CHEN: Aerosol loading characteristics of personal cyclone samplers S1091

A. GUDMUNDSSON, G. LIDÉN: Optimisation of the SIMPEDS personal sampling cyclone to the ISO sampling convention for thoracic dust S1093

Session 10B: ACE-2 II

D.W. JOHNSON, S. OSBORNE, R. WOOD: Aircraft measurements of the evolution of aerosol characteristics in lagrangian experiments during ACE-2 S1095

R. WOOD, D.W. JOHNSON, S. OSBORNE: The effect of drizzle on the redistribution of aerosol in the boundary layer: Estimation of the scale of the effect during ACE-2 using aircraft data S1097

M. DE REUS, J. STRÖM, J. CURTIUS, L. PIRJOLA, F. ARNOLD, M. KULMALA: Indications for aerosol growth in the free troposphere during the ACE-2 experiment S1099

O.H. BERG, K. HÄMERI, E. SWIETLICKI, J. ZHOU, M. VÄKEVÄ, J.M. MÄKELÄ: A comparison of the hygroscopic properties of aerosol particles in the marine boundary layer and the free troposphere-preliminary results from the ACE-2 experiment S1101

D. WEISE, W. BIRMILI, A. WIEDENSOHLER, D.S. COVERT: New particle occurrence in the polluted marine boundary layer during the ACE-2 experiment S1103

Session 10C: Transport and Hydrodynamics II

C. GUTFINGER, M. FICHMAN, D. PNUELI: Effect of lift on the motion of aerosol particles S1105

J.L. CASTILLO, P.L. GARCIA-YBARRA: Diffusive leakage of small particles towards blowing surfaces S1107

W. OOSTRA, J.C.M. MARIJNISSEN, B. SCARLETT: The measurement of thermophoresis under gravity conditions and the influence of charge S1109

M. ITOH, H. NAKASHOJI, E. ARAKAWA, H. TAKANO: Photophoretic motion of a carbon particle in a quadrupole cell by visible and invisible laser irradiation S1111

T. ZARUTSKAYA, S. LEKHTMAKHER, M. SHAPIRO: Monte-Carlo simulation of particle stochastic trajectories: A model for magnetic filtration of nanometer aerosols S1113

Session 10D: Modelling II: Nucleation and Activation

A.A. LUSHNIKOV, M. KULMALA: Foreign aerosol in nucleating vapour S1115

I.J. FORD: How aircraft nucleate ice particles: A simple model S1117

R.J. BARTHELMIE, S.C. PRYOR: A new mechanism for modeling secondary organic aerosol formation from monoterpenes S1119

L.M. RUSSELL, J.H. SEINFELD: Comparison of modelled particle activation to cloud droplets in clean and anthropogenically-influenced aerosol conditions S1121

C.F. CLEMENT, I.J. FORD: Analytic models for atmospheric aerosols based on nucleation bursts S1123

Session 10E: Filtration II: Electrical Methods

M.T. CHENG, C.H. LIAO, J.L. WANG: Removal efficiency for submicron ammonium chloride particles by electrocyclone S1125

J.S. CHANG, P.C. LOOY, C. WEBSTER: The effects of dust loadings on the collections of fine particles by an electrostatic precipitator with DC or pulse energized prechargers S1127

M. JAMRISKA, L. MORAWSKA, Z. RISTOVSKI: Performance assessment of electrostatic filters with a focus on submicrometer particles S1129

Y. ZIMMELS, S. KOJEVNIKOV: Mechanism of collection of aerosol by a dispersion of charged droplets S1131

Session 11A: Sampling III: Personal Samplers

F. ROGER, G. LACHAPELLE, J.F. FABBRIÈS, P. GÖRNER, A. RENOUX: Behaviour of the IOM aerosol sampler as a function of external wind velocity and orientation S1133

V. AIZENBERG, S.A. GRINSHPUN, K. WILLEKE, O. WITSCHGER, J.P. SMITH, P.A. BARON: Performance evaluation of personal aerosol samplers using full-size manikin and simplified torso S1135

S.A. GRINSHPUN, V. AIZENBERG, K. WILLEKE, J. P. SMITH, P. A. BARON: Personal aerosol sampler with curved porous inlet: Wind tunnel evaluation using a full-size manikin S1137

S.J. DUNNETT: A viscous model of aerosol sampling S1139

O. WITSCHGER, J. MALET, D. BOULAUD, F. ROGER, J.F. FABRIES, P. GÖRNER: Transmission efficiency of tubular sampling probes: A new experimental and numerical investigation S1141

Session 11B: ACE-2 III

P.B. RUSSELL, J.M. LIVINGSTON, B. SCHMID, A. CHIEN, S. GASSO, D. HEGG, K. NOONE, D. COLLINS, H. JONSSON, K. NIELSEN, P. DURKEE, R. FLAGAN, J. SEINFELD, T.S. BATES, P.K. QUINN: Clear column closure studies of urban-marine and mineral-dust aerosols using aircraft, ship, and satellite measurements in ACE-2 S1143

B. SCHMID, J.M. LIVINGSTON, P.B. RUSSELL, P.A. DURKEE, H. JONSSON, K.E. NIELSEN, S. GASSÓ, E.J. WELTON, K. VOSS, P. FORMENTI, M.O. ANDREAE: Three dimensional investigation of lower tropospheric aerosol and water vapor during ACE-2 by means of airborne sunphotometry S1145

R. VAN DINGENEN, F. RAES, J.P. PUTAUD, M. MANGONI: Processes relating aerosol number, aerosol volume and non-seasalt sulfate concentrations in the clean and polluted marine boundary layer S1147

P.A. DURKEE, K.E. NIELSEN, P.B. RUSSELL, B. SCHMID, J.M. LIVINGSTON, D. COLLINS, R.C. FLAGAN, J.H. SEINFELD, K.J. NOONE, S. GASSÓ, D. HEGG, T.S. BATES, P.K. QUINN: Regional aerosol properties from satellite observations: ACE-1, tarfox and ACE-2 results S1149

S. PHILIPPIN, C. NEUSÜß, A. WIEDENSOHLER, J. HEINTZENBERG, C.M. CARRICO, M.J. ROOD: Optical properties of anthropogenically influenced aerosols in a marine atmosphere: An optical closure experiment S1151

Session 11C: Modelling III: Atmospheric Aerosols

M.J. KLEEMAN, G.R. CASS: Effect of emissions control strategies on the size-and composition-distribution of urban particulate air pollution S1153

N. PIRRONE: Modeling the dynamics of atmospheric mercury over the mediterranean sea: The MAMCS project S1155

J.J.N. WILSON, F. RAES: A comparison of two sulfate aerosol dynamics models S1157

U. SHANKAR, A.F. HANNA, I.J. ACKERMANN, F.S. BINKOWSKI: Analyses of radiation profiles over two industrial source regions using a three-dimensional gas-aerosol model S1159

V. JAENISCH, F. STRATMANN, M. WILCK: Particle nucleation and condensational growth during turbulent mixing processes S1161

Session 11D: Filtration III: Characteristics

I.L. TUINMAN, L. STEENWEG: The influence of particle shape on the penetration through fibrous filters S1163

G.S. MARTIN, I. POTTS, T.H. FROST: Numerical solution of the Navier-Stokes equations for flow round a fibre as a basis for predicting filter efficiency S1165

S. DHANIYALA, B.Y.H. LIU: Numerical estimation of filter fiber drag considering structural inhomogeneity S1167

W.S. POON, B.Y.H. LIU: Filtration characteristics of porous foam media S1169

Session 11E: Nuclear Aerosols

J.O. COSANDEY, PH. RUDOLF VON ROHR: Experimental validation of a deterministic model for aerosol reentrainment out from the boiling pool S1171

V. SALDO, E. VERLOO, A. ZOULALIAN: Study on aerosol deposition in the Piteas vessel by settling, thermophoresis and diffusiophoresis phenomena S1173

C.F. CLEMENT, T. GARNIER, R. ZEYEN: The behaviour and detection of radioactive aerosols in Natacha S1175

A.M. BEARD, C.G. BENSON, C.C. KEMP, P.N. SMITH: The effectiveness of AD-HOC filtration-gravel bed studies S1177

M.P. KISSANE, I. DROSIK, M. MISSIRLIAN: The impact of vapour-phase chemistry on fission product transport S1179

Special Session: Continuous Particle Mass and Composition Measurement

C. SIOUTAS, S.T. FERGUSON, J.M. WOLFSON, H. OZKAYNAK, P. KOUTRAKIS: High-volume, artifact-free fine particle collection for use in toxicity studies S1181

C. SIOUTAS, P. KOUTRAKIS, P.-Y. WANG, P. BABICH, J.M. WOLFON: Continuous particle mass measurement by recording the pressure drop in nuclepore filters S1183

K.A. PRATHER, C.A. NOBLE, D.-Y. LIU, P.J. SILVA: Single particle analysis of transient variations occurring in atmospheric aerosols S1185

P. BABICH, G. ALLEN, M. DAVEY, C. SIOUTAS, P. KOUTRAKIS: Field performance evaluation of Harvard continuous fine mass monitor S1187

S.V. HERING, M.R. STOLZENBURG: Automated, high-time resolution measurement of fine particle nitrate S1189

F. OBEIDI, E. PATTERSON, D.J. EATOUGH: A real-time sampler, RAMS, for the determination of $PM_{2.5}$, including semi-volatile species S1191

Z. GE, A.S. WEXLER, M.V. JOHNSTON: Laser desorption/ionization of single ultrafine multicomponent aerosols S1193

J.O. ALLEN, L.S. HUGHES, M.J. KLEEMAN, G.R. CASS, E.E. GARD, D.S. GROSS, M.E. GÄLLI, B.D. MORRICAL, K.A. PRATHER: Determination of the particle counting efficiency and chemical sensitivities of an aerosol time of flight mass spectrometer under ambient sampling conditions S1195

S.A. EDGERTON, J.C. CHOW, J.G. WATSON: The use of continuous monitors for characterizing fine particle concentrations S1197

Session 12A: Modelling IV: Climate

I.N. Sokolik, O.B. Toon: Modeling the radiative properties of mineral aerosols for climate studies and remote sensing applications S1199

L.M. Robinson, D.L. Roberts: An interactive simulation of the direct radiative effect of black carbon aerosol in a climate model S1201

M.J. Woodage, D.L. Roberts: Simulations of sulphate aerosol and its impact in a climate model S1203

S. Woodward, D.L. Roberts: Modelling mineral dust within an atmospheric general circulation model S1205

S.L. Gong, L.B. Barrie, J.-P. Blanchet, J. Jian, E. Girard, H. Lin, R. Leaitch, U. Lohmann, G. Lesins, P. Chyleck, K. Von Salzen, H. Leighton: An introduction to CAM – Canadian aerosol module S1207

Session 12B: Atmospheric: Optical Properties I

P. Lilienfeld: Dual-wavelength nephelometry for $PM_{2.5}$ monitoring S1209

P. Herrmann: Longtime monitoring of the optical properties and the soot content of atmospheric boundary layer particles in Central Europe S1211

Y.I. Tsai, M.T. Cheng: Effects of sulfate and humidity on visibility in the Taichung harbor area (Taiwan) S1213

K. Miura, M. Yabuki, M. Ichikawa, S. Nakae, H. Kojima, N. Takeuchi, H. Kuze, H. Kinjo, N. Sato: Simultaneous observation of aerosols in the planetary boundary layer by using kytoon and lidar S1215

J.F. Léon, P. Chazette, E. Hamonou, F. Dulac: Characterization of urban aerosols using ground-based and spaceborne (Polder) remote sensing S1217

Session 12C: Workplace Aerosols

M.J. Sheehan: The "State of the art" of metal working fluid (MWF) mist in the US: Reducing exposures by controls, cooperation and consensus S1219

A. Cavallo, K.W. Tu, A. Hutter, P. Shebell: Activity weighted size distribution measurements in a diesel powered uranium mine S1221

Y.M. Kuo, C.S. Wang: Characteristics of chromium droplets generated from gas bubbling in chromium electroplating processes S1223

M.A. Byrne, K.F. Bell, C.L. Fogh, D.V. Vollmair, J. Roed, A.J.H. Goddard: Evaluation of sampling techniques for aerosol-exposed skin S1225

M. Spanne, J. Melin, R. Johnsson, A. Colmsjö, M. Bohgard: Thermally generated aerosols from polyurethane products S1227

Session 12D: Deposition and Resuspension

M.M. Jackson, K.E. Noll, T.M. Holsen: Dry deposition model for atmospheric particles S1229

K. Gotoh, H. Masuda: Enhancement of removal efficiency of deposited single particles by a high speed air jet S1231

P.F. Dunn, X. Li, R.M. Brach: Microparticle impact and deposition studies S1233

A. Litvak, A.J. Gadgil, W.W. Fisk: Experimental observation of hygroscopic fine mode aerosol deposition on electronic circuits and resulting degradation of circuit performance S1235

M. Shimada, K. Okuyama, M. Adachi, T. Fujii: Aerosol particle removal at reduced pressure by an electrical precipitator using UV/photoelectron method S1237

Session 12E: Instrumentation VI: Mobility Analysis

L. Mädler, W. Koch: A new system for in-situ aerodynamic classification with application to dustiness tests and powder characterization S1239

I.G. Loscertales: Theoretical effect of an axial electric field upon the resolution of classic differential mobility analyzers S1241

P.B. Withers, E.V.J. Foot, J.M. Clark: The measurement of particle size and mobility in an electric field S1243

B. YUSKIEWICZ, F. STRATMANN, TH. KAUFFELDT: Resolution of a TDMA-inversion algorithm S1245

H. EMI, E. SHINTANI, N. NAMIKI, Y. OTANI: Measurement of the ions mobility distribution at a new ion mobility analyzer with separation in axial direction to the flow S1247

Session 13A: Chemical Analysis

K.R. SPURNY: On the radioactive labeling in the experimental aerosol research S1249

R. VEHRING, G. SCHWEIGER: Dispersive Raman spectroscopy on soot particles S1251

K.-P. HINZ, M. GREWELING, H. IGLESEDER, A. TRIMBORN, B. SPENGLER: Source identification of single particles by on-line laser mass spectrometry S1253

J.G. OLSSON, J.B.C. PETTERSSON: A particle beam apparatus for studying interactions of alkali salt aerosol particles with hot metal surfaces S1255

Session 13B: Atmospheric Optical Properties II

A. KEIL, M. WENDISCH: Aerosol absorption in a heavily polluted area S1257

W. VON HOYNINGEN-HUENE, T. SCHMIDT, A.K. CHAN, J. HEINTZENBERG, C. NEUSUESS: Climate-relevant aerosol parameters of South-East-Asian forest fire haze S1259

H. WEX, C. NEUSÜß, D. COVERT, A. WIEDENSOHLER: In-situ closure studies on scattering coefficients and mass in the polluted continental boundary layer S1261

E. HAMONOU, P. CHAZETTE: Evidence of Saharan mineral aerosols transport to the Mediterranean inside well-defined layers S1263

F. DULAC, P. CHAZETTE: Balloonborne profiling of African dust over the tropical atlantic S1265

Session 13C: Lung Deposition and Clearance

Z. ZHANG, X. WANG, Y.S. CHENG: Flow pattern and aerosol deposition in the human oral airway S1267

C.L. TRAN, A.D. JONES, R.T. CULLEN, K. DONALDSON: Influence of particle characteristics on the clearance of low toxicity dusts from lungs S1269

R.E. SIEVERS, P.D. MILEWSKI, S.P. SELLERS, K.D. KUSEK, P.G. KLEUTZ, B.A. MILES: Supercritical CO_2-assisted methods for the production and pulmonary administration of pharmaceutical aerosols S1271

L. GRADOŃ, D. ORLICKI, A. PODGÓRSKI: Gas flow and particle deposition in the model of pathological human alveolus S1273

Session 13D: Coagulation and Fractals

A.M. BRASIL, T.L. FARIAS, U.O. KOYLU, M.G. CARVALHO: A recipe for image characterization of fractal-like aggregates S1275

G. SKILLAS, K. SIEGMANN, U. BALTENSPERGER: The density and fractal-like dimension of particles sampled from a laminar diffusion flame S1277

F. PIGEONNEAU, F. FEUILLEBOIS: Collision and size evolution of drops in homogeneous isotropic turbulence S1279

T. KRINKE, K. DEPPERT, M. MAGNUSSON, H. FISSAN, F. SCHMIDT: Agglomeration of nanoparticles on substrate surfaces due to particle interactions during deposition S1281

E. OTTO, U. DROSTEN, H. FISSAN, S.H. PARK, K.W. LEE: Analytic solution of the coagulation equation for log-normal distributed aerosols in the entire size regime S1283

Session 13E: Exposure and Control

F.M. KNIEST, K-U. BLANK, N. KALSDORF: Differences between air permeable and air-nonpermeable fabrics on the efficacy and comfort of mite and allergen-proof encasings S1285

K. GYSELS, R. VAN GRIEKEN: Microanalysis of museum aerosols related to the conservation of works of art: case study of the Sainsbury centre for visual arts, Norwich, UK S1287

R.A. THOMAS, S.J. DUNNETT: The study of the efficiency of downdraft exhaust hoods S1289

M. ROFF, P. BALDWIN, J. THOMPSON, J. WHEELER: Consumer exposure arising from the application of indoor pesticides S1291

K.F. BELL, C.L. FOGH, M.A. BYRNE, A.J.H. GODDARD, J. ROED: Aerosol deposition velocity measurements on human body surfaces S1293

Session 14A: Atmospheric: Optical Properties III

MENG-DAWN CHENG: Climatology and radiative transfer properties of aerosol over a site of the size of 250 by 350 km^2 S1295

P.V. HOBBS, T. NOVAKOV, P. RUSSELL, J.L. LIVINGSTON, J.L. ROSS: Relative contributions of atmospheric aerosol constituents to optical depths and direct radiative forcing on the United States east coast S1297

J.P. VEEFKIND, G. DE LEEUW, P.A. DURKEE: Aerosol optical depth retrieval over land from two angle view satellite radiometry S1299

P. CHAZETTE, J. PELON, I. CARRASCO, V. TROUILLET, F. DULAC: Infrared radiative forcing of a Saharan dust plume in the North Atlantic S1301

C. LIOUSSE, H. CACHIER, W. GUELLE, T. CLAQUIN, P. CHAZETTE: Radiative impact of carbonaceous aerosols S1303

Session 14B: Indoor Aerosols

J.J. LIN, H.S. TAI: Indoor/outdoor relationships of airborne particles and elemental composition S1305

P.R. NELSON, S.P. KELLY, F.W. CONRAD, R.J. REYNOLDS: Cigars as a source of environmental tobacco smoke S1307

G.H. WAN, C.S. LI: Indoor endotoxin and glucan in association with sick building syndrome S1309

C. HUET, G. TYMEN, A. REINEKING, J. WENDT: Inter-comparison measurements of the activity size distribution of aerosol attached short-lived radon decay products in a dwelling located in Brittany S1311

M. BOHGARD, P. EKLUND: Effects of an ionizer on sub-micron particles in indoor air S1313

Session 14C: Optics

B. GORBUNOV, R. HAMILTON: A Radiative transfer model of aerosol particles on a filter S1315

N.J. BACON, B.D. SWANSON, M.B. BAKER, E.J. DAVIS: Laboratory measurements of light scattering by single ice particles S1317

S. DI STASIO: In-situ optical characterization of agglomerated soot in ethylene flame: Relevance of the depolarized light scattering S1319

A.K. RAY, H. TU: Determination of unsteady state evaporation and growth rates of binary microdroplets from time-dependent light scattering S1321

W.W. SZYMANSKI, C. SCHINDLER, T. CIACH: Dual optics particle spectrometer-performance and capability of real time evaluation of complex index of refraction of aerosol S1323
